

Join the **Egis team** in **Žilina!**

Summer Internship Opportunity: Aviation Consulting and Engineering

Watch a short video!

Are you ready to climb to new heights in your career?

With more than 4,000 successful projects in more than 100 countries, Egis invites passionate students to join our team of experts during the summer!

Are you goal-oriented, have the determination to learn quickly, English at least at B2 level and a passion for aviation?

If so, we are looking for you!

Why **choose Egis** for your internship?

- ✦ Get unparalleled experience with global projects in the field of aviation.
- ✦ Contribute to real-world solutions that shape the future of aviation.
- ✦ Work with aviation experts, project managers and seniors with many years of experience
- ✦ FTE offer for successful interns (50 – 70% of interns are usually offered the full time job)

At Egis, we are at the **forefront of the aviation industry**, providing consultancy services and innovative solutions to institutions, air traffic service providers and airport operators. In its projects, Egis minimises the impact on the environment and works to protect and restore the ecosystems. **We are committed to becoming carbon neutral by 2050 and integrating sustainability into our strategy, corporate social responsibility and innovation programs.**

As an Egis intern, you'll dive into the heart of aviation innovation, gain hands-on experience and learn from the **best minds in the industry**. You will have the opportunity to contribute to ongoing projects and use our processes, tools and advanced systems.

As an intern, you will be based in our local **office in Žilina**. In individual cases, we are flexible regarding commuting and can allow working from home when needed, as we do as well. **The duration of the internship is 2 months, occurring during the summer break of 2024.**

Students said about us:

"Working for Egis during my studies is an opportunity for me to find out which field of aviation I want to pursue after graduation. The tasks I work on are similar to semestral projects, and the knowledge and experience were useful at school. An interesting experience - worth a try."
